

Editorial Concept

In high-quality and informative articles, **ees International - The Electrical Energy Storage Magazine** provides the battery and energy storage industry @ees-magazine.com with international news, background reports and market information, free of charge.

The magazine provides information on topics and trends from related fields of industry, such as renewable energy, electric mobility, smart homes, distribution structure and energy policy. The publication primarily targets markets in European countries, especially Germany; the USA; MENA, Asia with a focus on China and India; as well as South America.

News and articles are sorted according to the reader's needs ? supported by an additional search feature.

The magazine is divided thematically into the following categories:

- industry announcements and news (News)
- current market trends and regional news (Markets)
- technology, innovations, state of research (Technology)
- topics related to the global production of batteries and components (Production)
- practical applications for consumers and smart homes (Applications)
